

September is National Prostate Awareness Month

Middle Tennessee Medical Center will be offering a free PSA screening for prostate cancer. A free diabetes screening is also available to those who register for the PSA.

FREE PSA SCREENING **Saturday, September 26**

9:00 a.m. to noon | MTMC Cancer Center | 503 East Bell Street

To schedule your **FREE** screening and required blood draw
Call 615-396-4293

Participants are **REQUIRED** to have blood work completed prior to the screening.

MTMC Outpatient Diagnostic Lab, by appointment only

FREE BLOOD DRAWS for PSA and Diabetes

Monday-Friday, September 7-18 | 9:00 a.m. to 4:00 p.m.

All males over the age of 50 should have annual PSA and diabetes screenings.

African American males and males with a family history of prostate cancer should have a yearly PSA over the age of 45.

Tennessee is number one in the nation for people between the ages of 45-65 with diabetes and ranks fifth in the nation for the prevalence of diabetes in general.

We're here for life.
